Safety Pod International

Education Products and Services

Safer, Supportive, Pupil-Centred Design

The Safety Pod™ Approach:

Innovation in Education

Safety Pod International's Education Department offers innovative services that prioritise pupil voice, emotional regulation, and wellbeing. From creative co-design pathways such as the **Limitless Range** to the interactive **Architect Project**, pupils are empowered to personalise Pods, explore emotions, and shape supportive learning environments. Schools report positive cultural shifts, with pupils proactively using Pods to self-regulate and staff gaining valuable insights into emotional needs and triggers.

Our services also include 1:1 consultation and on-site Safety Pod™ Training, equipping staff with proactive, pupil-centred strategies.

Together, we aim to create safer, more inclusive spaces where every pupil's voice is heard.

What is the Safety Pod™?

A clinically backed, specialist piece of equipment and trauma-informed intervention solution designed to:

- ♦ Minimise use of force.
- ♦ Enhance de-escalation.
- ♦ Promote therapeutic and sensory regulation.
- ♦ Prioritise pupil-centred practice.
- ♦ Support trauma-informed approaches.

Where can a Safety Pod™ be used?

Designed as a piece of furniture, the Safety Pod™ can be incorporated into any environment to promote self-regulation and support further intervention safely when needed for example:

- ♦ Classrooms
- ♦ Calm areas
- ♦ Sensory rooms
- ♦ SEMH Units
- ♦ Pupil Referral Units
- ♦ CAMHS services

Proven Impact – Case Study

Green Lane Primary Academy - Northeast

Implementation:

Active Pupil Voice – Students co-designed their own Safety Pods, taking ownership and pride in creating supportive spaces tailored to their needs.

High Engagement – Pupils were excited throughout the process, eagerly anticipating sessions and contributing creative, thoughtful ideas.

Creative Development – Art therapy-inspired sessions encouraged teamwork, critical thinking, and new skill development.

Results:

Wellbeing Priority – Green Lane School embraced The Safety Pod™ Architect Project to strengthen its trauma- and attachment-informed approach and support pupil mental health.

Meaningful Outcomes – Staff gained valuable insights into pupils' emotional needs and potential triggers, while pupils reported feeling calmer, more focused, and proud of their work.

Long-Lasting Impact – The personalised Safety Pods serve as therapeutic resources within the school and have been embedded into daily wellbeing practice.

Choosing the Right Safety Pod™

We offer a wide range of Safety Pods to suit a wide range of settings and meet the needs of your pupils.

01 Standard Safety Pod™

The Standard Safety Pod™ is the original model in the Safety Pod™ range, thoughtfully created to provide safe, supportive, and respectful intervention within schools, care and therapeutic settings. Made with a soft, durable material that is easy to keep clean, it offers a comfortable space that supports de-escalation, positive behaviour strategies, and calmer outcomes.

Trusted by many education and care providers, the Standard Safety Pod™ helps create a safer, more nurturing environment while always keeping the well-being and dignity of children and young people at the heart of its design.

Fabric Specifications:

Made with flame retardant, waterproof, stain resistant fabric.
For full fabric specifications and sizes please visit our website.

Standard Colours:

Please note that the colour swatches shown may vary slightly from the actual colours of the printed fabric due to differences in printing processes.

02 V3 Safety Pod™

The V3 Safety Pod™ has been thoughtfully developed for moments when pupils may be in significant distress and need extra support to safely de-escalate. Made from an ultra-strong, fire-rated material with enhanced resilience against damage, it is designed to cope with the most challenging situations while still offering the same calm and therapeutic support as the rest of the Safety Pod™ range.

With its added durability and carefully designed safety features, the V3 gives staff a dependable resource they can trust during times of crisis. It helps reduce risk of harm, supports safer outcomes for pupils, and provides teachers with reassurance and confidence that they have a tool to help restore calm when it matters most.

V3 Colours

The Limitless Range

The Safety Pod™ Limitless Range is all about giving children and young people a sense of ownership over their space and a voice in shaping their environment. This unique, person-centred service invites pupils to co-design their own Safety Pods, making them feel truly part of the process.

From choosing colours, patterns, and designs to sharing their own artwork; whether hand-drawn or digital, each Safety Pod™ becomes a reflection of the individuality and creativity of the pupils who use it. By involving them in the design, teachers can foster pride, belonging, and a stronger connection to the learning environment.

Theme Request

Pupils can choose a theme that reflects their interests, preferences, or favourite colours, helping them feel connected to their learning space. Our design team will then create a custom digital design and share it with the school for review and approval before bringing the final Safety Pod™ to life.

Size	Height	Seating Height	Depth
X Small	30"	16"	32"

"The Pod makes you feel relaxed and comfy and know you're in a safe place"

Pupil (Aged 10)

04

The Architect Project

Empowering young minds through co-design.

This programme engages children in designing therapeutic Pods, using art therapy to explore and express emotions through colour, texture, and illustration. It highlights how our environment can support wellbeing and empowers children to take a leading role in shaping their learning environment and personalised support pathways.

Spark creativity and emotional expression through a real-world design challenge.

Research, plan, design, and present with expert support every step of the way.

See ideas transformed into professionally manufactured Safety Pods.

On enquiry, you will be invited to attend an initial consultation call with our Education Director. On booking you will have access to lesson plans, resources and offered close support and guidance throughout your Architect Project journey.

05 The Doodle Pod

Created to support children's mental health and well-being in schools, The Doodle Pod is the perfect multi-functional resource for learning environments.

Designed with a durable, dry-wipeable surface it features vibrant illustration, empowering positive affirmations, thoughtful journalling opportunities and calming breathing exercises.

The Doodle Pod transforms any space into a mindful hub. More than just furniture, it's a powerful tool for supporting pupil mental health and wellbeing.

Available in two designs to appeal to a range of age groups, The Doodle Pod is a practical, engaging way to promote relaxation, mental clarity and overall well-being in the classroom.

06 Sensory Tact Tiles

Enhance Every Space with Comfort and Innovation

Transform your learning environment with Sensory Tact Tiles – the ultimate sensory solution that goes beyond the floor. Perfect for classrooms, therapy rooms, and homes, Tact Tiles not only provide a soft, supportive flooring experience but also offer the unique ability to link and attach to walls, creating a fully immersive sensory space.

Multi-surface Sensory Experience – Unlike any other, Tact Tiles easily connect to both the floor and walls, expanding your sensory environment in ways you never thought possible.

Premium Comfort – Made from slow-rebound memory foam, these tiles absorb pressure and reduce strain, providing long-lasting comfort during sensory activities.

Adaptable Design – With our Tact Tile Extender Kit, you can effortlessly extend your space and create sensory walls, giving you unlimited design options for interactive environments.

Durable & Safe – Non-slip backing, hypoallergenic materials, and sound-dampening technology make these tiles perfect for any environment, providing safety, peace, and a calming effect.

Easy Maintenance – Removable, machine-washable covers and waterproof lining keep your tiles looking fresh with minimal effort.

Size	Width	Depth	Length
Standard	24"	35"	35"

07

XL Leg Support Cushion

The XL Support Cushion has been thoughtfully designed for classroom use, providing pupils with a comfortable place to lounge. Designed with versatility and safety in mind, this product also works in conjunction to The Safety Pod™ to offer gentle support during moments of crisis where a student's legs may need to be safely supported. Medically reviewed and made with fire-retardant, high-density foam, it provides teachers with a reliable, reassuring resource.

With a wide choice of bold patterns and vibrant colours, the XL Support Cushion can brighten learning spaces and inspire creativity. For schools looking for something more personal, we also offer bespoke design and embroidery options. While the cushion comes in one standard size, custom sizes can be made to meet specific needs.

Fabric Specifications:

Flame Retardant:
BS7176 Crib 5,
BS EN 1021-1:2006 1&2,
BS5852 Crib 5.

Composition:
Weave/Linen 2% PU,
74% PVC,
12% Polyester,
12% Cotton.

XL Leg Support Cushion Colours:

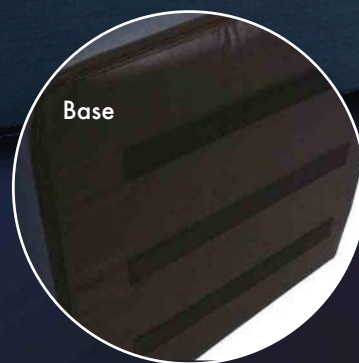

Length	Width	Weight
50"	41"	Approx 7.8kg

Please note that the colour swatches shown may vary slightly from the actual colours of the printed fabric due to differences in printing processes.

08 Support Wedge System

The Support Wedge System is a practical and reassuring resource created to help staff safely and gently support pupils during times of intervention. It has been designed to assist in the controlled transition from lying on the floor to a more comfortable, semi-seated position.

This supportive approach is especially valuable in special school settings, where maintaining both safety and dignity is vital during moments of distress or when pupils need extra care. By providing a calmer and more secure way to manage these transitions, the Support Wedge System helps teachers and support staff feel more confident, while ensuring pupils are cared for with comfort and respect.

Support Wedge System Colours:

Midnight

Teal

Purple

Charcoal

Please note that the colour swatches shown may vary slightly from the actual colours of the printed fabric due to differences in printing processes.

Fabric Care Instructions

To maintain the appearance, hygiene, and longevity of your Safety Pod™ and associated products, please follow these guidelines:

Routine Cleaning:

- ◆ Use a vacuum cleaner or soft brush to remove dust and solid particles.
- ◆ Wipe surfaces frequently with a damp microfibre cloth using cold or warm water.
- ◆ For deeper cleaning, use mild Hypochlorite solutions (up to 10,000 ppm chlorine, including Haz Tabs and Chlor-Clean) or approved disinfectants.
- ◆ Spirit-based solutions can be used for stains containing oil or grease.

Important Care Notes:

- ◆ Always test any cleaning solution on a hidden area of fabric first.
- ◆ Remove all stains immediately before they set to prevent permanent marking.
- ◆ Do not use solvents, chemical agents, waxes, polishes, or marker pens on the fabric as these can cause permanent damage.
- ◆ Avoid placing products on wet or slippery surfaces.

Precautions:

- ◆ Poorly fixed clothing dyes (e.g., denim) can cause permanent staining.
- ◆ All spillages should be promptly removed using a clean, absorbent cloth.
- ◆ Products can be steam cleaned in situ where necessary.

Fabric Features:

- ◆ All fabrics are waterproof, stain-resistant, and resistant to microbial and fungal growth, including MRSA, Salmonella, and E. coli.
- ◆ They are highly durable, with Martindale rub test ratings suited for severe contract use.

Qualitative User Feedback

“

"Having the Pods personalised and seeing how proud the children already are will make a huge difference."

Headteacher

"It was very positive as we were able to express our emotions and feelings in a creative way. I have hope that I too can make something that is worthwhile like the inventor."

Pupil- Age 11

"Students have expressed a strong preference for the Safety Pods. Many report feeling more in control of their emotions and behaviours when they have access to a designated space where they can retreat, calm down, and regroup. The ability to use the Safety Pods as a proactive tool rather than a reactive measure has empowered students, giving them a sense of agency over their own emotional regulation."

St John's College

"Sensory Tact Tiles are just what we were looking for! Such a cost-effective way to create a range of sensory spaces. I love that they can be adapted for walls as well as floors. We've purchased a second set to extend our sensory space, and it works brilliantly to support our pupils during therapy sessions."

"The ethos behind the project aligned perfectly with what we stand for. We're working hard to become a trauma- and attachment-informed school, and we're in the process of opening a SEMH (Social, Emotional, and Mental Health) base provision, so engaging with this project was a very easy yes!"

Green Lane Primary School

"This project is excellent in empowering children who are often disempowered by the system. It increased the children's confidence and sense of self-worth."

Richmond Foundation, Malta

"We are delighted with the Pods, our pupils will benefit so much from these! I was quite overwhelmed looking at the journey we have made. It is the most wonderful experience for our students to be able to take ownership of this aspect of their learning environment."

Priory Woods College

"The Pods are a fantastic addition to our school! The children now actively seek them out when they are feeling dysregulated and we see the positive impact they have. Can't recommend them highly enough!"

Safeguarding and Pastoral Lead,
Green Lane Primary Academy
